Webinar Agenda

- The Indiana Resource Network and the role of Project SUCCESS
- Federal Updates
- Content Connectors
- Writing goals aligned to grade level Indiana Academic Standards
Learning Objectives

Participants will be able to…

• Use Content Connectors (grade level standards) and identify access skills.

• Understand components of measurable goals.

• Develop goals based on grade-level academic standards.
"If our children are not included in the regular classroom and excluded from the school community, why should we expect them to be included in the community that follows - LIFE."

Interested in Unpacking the Content Connectors in order to better understand the skills for all learners? Listen to our Project SUCCESS teachers share the positive impacts of unpacking the Content Connectors. Then, join our Discussion page for additional tips, resources, and materials to get started with the unpacking process.
Indiana Resource Network
Project SUCCESS
Indiana Resource Network

The Indiana Resource Network (IRN) is made possible by the Indiana Department of Education’s (DOE) special education grants. It is comprised of centers that provide targeted, comprehensive support to schools across the state to improve teaching and learning.
What We Do

Project SUCCESS is a resource center that supports higher academic achievement for students with disabilities. We are building local capacity to ensure that students with significant cognitive disabilities achieve increasingly higher academic outcomes and leave high school ready for post-secondary options. Project SUCCESS is part of the Indiana Resource Network and strives to support teams of teachers and administrators in Indiana as they work to implement academic standards into instruction for students with disabilities.

Impact on Goal Writing

- Aligned to Grade Level Standards (including students with significant cognitive disabilities)
- Connecting Present Level of Academic Performance to IEP Goals
- Identifying Access Points and Barriers
- Specially Designed Instruction
- Progress Monitoring
Content Connectors
**Assumptions**

- Students should have access to general education standards and curriculum
- Content Connectors should be used to provide a bridge to the Indiana Academic Standards
- IEP goals should be aligned to grade level for which the student is enrolled (Indiana Academic Standard or Content Connectors)
Content Connectors

- **Alternate Academic Standards in Indiana**

- **Identify priorities in each content area (ELA, Math, Science, Social Studies) to guide instruction for students with significant cognitive disabilities**

- **Aligned to the Indiana State Standards**

- **Assessed on ISTAR (Indiana’s Alternate Assessment)**

- **Highlight the necessary knowledge and skills in the Indiana State Standards needed for students to reach the learning targets at each grade level.**
Content Priority

Prioritizing Instruction
In an effort to empower teachers and focus on college and career readiness, the Office of Student Assessment has created Instructional and Assessment Guidance ("Guidance") documents for grades 3-8. The Content Priority of each Standard is delineated in the Guidance as one of three designations:

1) Critical – identified as “✓+”
2) Important – identified as “✓”
3) Additional – identified as “✓−”

Understanding Content Connectors

Standards…
• Are not curriculum
• Are not intended to define HOW we teach
• Do not define services provided

It is important that you…
• Study and understand the Indiana Academic Standards and Content Connectors
• Know how to support engaging, content rich curriculum and assessments that are aligned to academic standards
• Know how to create standards-based IEPs
Unpacking Content Connectors
Become Familiar with the Content Connectors

- The IEP team needs to become familiar with the Content Connectors for the each student’s assigned grade level.
- Unpack the skills within the Content Connectors-identifying access points for all levels of learners.
- Focus on what the student can do!
Unpacking Standards
Identifying the Skills within the Content Connectors

**Identify related skills allowing all students to access Content Connectors.**

- What communication skills are needed to access the Content Connector?
- How do we build background knowledge?

**What skills are embedded within Content Connectors?**

- How can we break down the Content Connector into segments?
- What are the varying levels of complexity in each access point?

**Identify Key Vocabulary within Content Connectors.**

- What vocabulary needs to be highlighted and pre-taught?
- What are the key assessment vocabulary?

**Functional Skills**

- How does this skill extend beyond the classroom?

**What are the varying levels of complexity in each access point?**

- Workplace and Employability skills
- Daily living and self advocacy skills

- Store, theater, interaction with peers, family life

**Tier 1**
- Low structural level
- Many graphics and picture supports
- Multiple choice with fewer options and visuals

**Tier 2**
- Medium structural level
- Range of difficulty and complexity
- Text and visual support

**Tier 3**
- High structural level
- Increased depths of knowledge
- Mostly text

What access skills are required for every student to master the selected grade-level standard?

Which access skills describe barriers for this student’s access to and progress toward this grade-level standard?
Writing Standard Based IEPs
Benefits of Standards-Based IEPs

• **A standards-based IEP:**
  - is built on the belief that a student with disabilities is capable of achieving grade-level proficiency if given appropriate instruction and supports;
  - addresses a broader, more meaningful set of academic skills and knowledge than a traditional IEP; and
  - ultimately prepares a student to earn a regular high school diploma and succeed after graduation.

• **Standards-based IEPs raise the bar on expectations and achievement:**
  - Parents and teachers have higher—but realistic—expectations of children with disabilities.
  - Students receive tailored instruction and accommodations to help them achieve in the general education curriculum at their enrolled grade level.

• **Standards-based IEPs encourage collaboration and awareness among educators, parents and schools. For example:**
  - Special education teachers, general education teachers and other IEP team members come to better understand their state’s academic content standards and will work together to support student learning.
  - Parents better understand what’s expected, according to state standards, of *all* students at their child’s grade level, how well their child is doing compared to the standards, and how to support their child’s learning at home.
  - Teachers will better understand what a student with disabilities needs to achieve grade-level standards.
What are Standards-Based IEPs?

Annual goals based on standards are not standards nor curriculum. They ...

• enable the child to be involved in and progress in the general curriculum.

• are directly related to the student’s needs as identified in the PLAAFP.

• teach skills crucial for learning the curriculum.

• include skills that meet other educational needs.

• always describe the expectations for what the student will accomplish and be able to do.

“...a process and document that is framed by the state standards and that contain annual goals aligned with, and chosen to facilitate the student’s achievement of, state grade-level academic standards.”

Source: Standards-Based IEPs: Implementation in Selected States, Project Forum at NASDSE, May 2007
The IEP goals for students who participate in ISTAR include:

- Indiana Academic Standard or aligned Content Connector for grade in which the student is enrolled
- Present level of academic and functional performance
- Description of benchmarks or short-term objectives (access points)
- Description of how student progress towards the goals will be measured
- Services or supports provided to the student to increase access to the general education curriculum
- Changes in the general education curriculum necessary for this student to access the content
Shifting Priorities

• Functional skills are still important for students with significant cognitive disabilities, but should be carefully reviewed to determine which skills are directly interfering with access to academic instruction and access to standards and curriculum. For example, the ability to tie shoes, button pants, etc., do not directly interfere with accessing academic content.

• Functional skills can be integrated into instruction in all classrooms during natural teaching moments.

• Many skills are taught to students that do not need to be IEP goals. IEP goals should focus on skills aligned to standards that have the greatest impact across academic subject areas, allowing the student increased access to grade level content.

• Support staff (SLP, OT, PT) can also align goals to academic standards by focusing on the specific skill that is limiting access or progress on standards.
# Goal Writing Template

## Present Level Data
- **What do we know about this student’s specific learning needs?**

Include PLAAFP Information

## Grade-level Academic Standards & General Access Skills
- **Which academic standards are most affected by the student’s disability?**
- **What access skills are required for every student to access the grade-level standard?**

Grade level IAS or Content Connector

## Student Specific Access Skills
- **What access skills will this student require to access the General Education curriculum?**

Unpacked Standards/Content Connectors (Unpacking Template)

## Accommodations
- **What services or supports may be provided to the student to increase access to the general education curriculum?**

## Modifications
- **In what ways must the general education curriculum be changed for this student to access the content?**

<td>Determine the author’s perspective or purpose of the text.</td>
</tr>
<tr>
<td></td>
<td>Identify the definition of the author’s purpose to persuade, inform and entertain (P.I.E)</td>
</tr>
</tbody>
</table>

| Student Specific Access Skills | Identifying a detail about the main character and the setting through picture identification (selecting a picture). Sequence details in order-beginning, middle and end-placing pictures in sequence. |
**Goal and Objectives:**

9-10.RN.3.3.a.1: Determine an author’s perspective or purpose in a text.

**GOAL:** After listening to a modified grade level text, Jalen will use pictures to find evidence of an author’s point of view (entertain, persuade or to inform) with 85% accuracy.

**Objectives:**

- Jalen will use a graphic organizer to sort pictures from the text into examples of the author’s purpose to persuade, entertain, or inform with 85% accuracy.
- When a short persuasive text is read aloud, Jalen will identify evidence of persuasion 65% accuracy.

**SLP**

- During whole group instruction, Jalen will use 3-word sentences to describe action, event, or pictures in a modified grade level text with no more than one prompt in 8 out of 10 opportunities.
<table>

Remember...

Indiana IEP Resource Center
Goal Development Checklist

IEP Summary
☐ IEP shows evidence of a direct relationship between present levels of educational performance, the goals and services to be provided.

Present Levels Of Performance
☐ are current and relevant to the student
☐ evidence of need for the target behavior clearly identified
☐ contains baseline data

Annual Goal
☐ Three components of measurability are evident.
☐ Target behavior (observable, repeatable, verifiable)
☐ Stimulus material or Conditions under which the skill is expected to occur
☐ Criterion for mastery or acceptable performance
☐ addresses a unique need of this student
☐ passes the stranger test
☐ identifies the skill the student will be taught
☐ reflects a realistic expectation of one year’s growth considering the student and his or her current skills
☐ allows a clear yes or no determination of whether the goal has been achieved
☐ can be reliably assessed

Keep the Planning Student Focused

• Begin with an overview of recent progress and strengths. Focus on what the student is able to do.
• Present levels—begin building a consensus of the student’s educational needs.
• Consider academics, communication and other areas to identify skills that can be used to promote access to the grade level content and accommodations and supports.
• Plan for the whole student – all professionals collaborate around the goals and outcomes
• Remember, shifting to higher academic expectations will take time, but students will respond!

Indiana Resource Centers

**Indiana IEP Resource Center**

Focus: To increase Indiana educators’ knowledge and skills that will (a) support the use of Indiana IEP to develop legally compliant IEPs that follow Article 7 requirements, (b) provide technical assistance and professional development for Indiana educators and staff who are involved in the development of high quality IEPs and (c) support Local Educational Agencies (LEAs) in the development and use of procedures to ensure compliance and the fidelity of implementation of IEP goals and services that will result in high quality instruction and programming evident by data review and progress monitoring.

**Project Success**

Project SUCCESS supports teachers and administrators in the design and implementation of Indiana Academic Standards in curriculum and instruction for students with significant cognitive disabilities. This includes providing critical background information and access to instructional and resource materials developed by NCSC. Project SUCCESS provides monthly professional development sessions to participating teams and on-site technical assistance as needed.

Indiana Resource Centers

IN*SOURCE
Focus: Since 1975, the Indiana Resource Center for Families with Special Needs or IN*SOURCE has provided service to Indiana’s families of infants, toddlers, children, youth and young adults with disabilities. IN*SOURCE is a parent organization. Through the work and dedication of the Board of Directors, the staff and many volunteers, virtually all of whom are parents of persons with disabilities, IN*SOURCE, utilizing a proven parent to parent model, has provided assistance, support services and educational resources to the community of individuals and organizations that serve and support persons with disabilities. Through the provision of information, training, individual assistance and support, they worked to help countless families confront the complexities and challenges of having a loved one with special needs. IN*SOURCE celebrates the accomplishments of individuals with disabilities and their families and affirms their ongoing commitment to them.
